

Survival rate per class

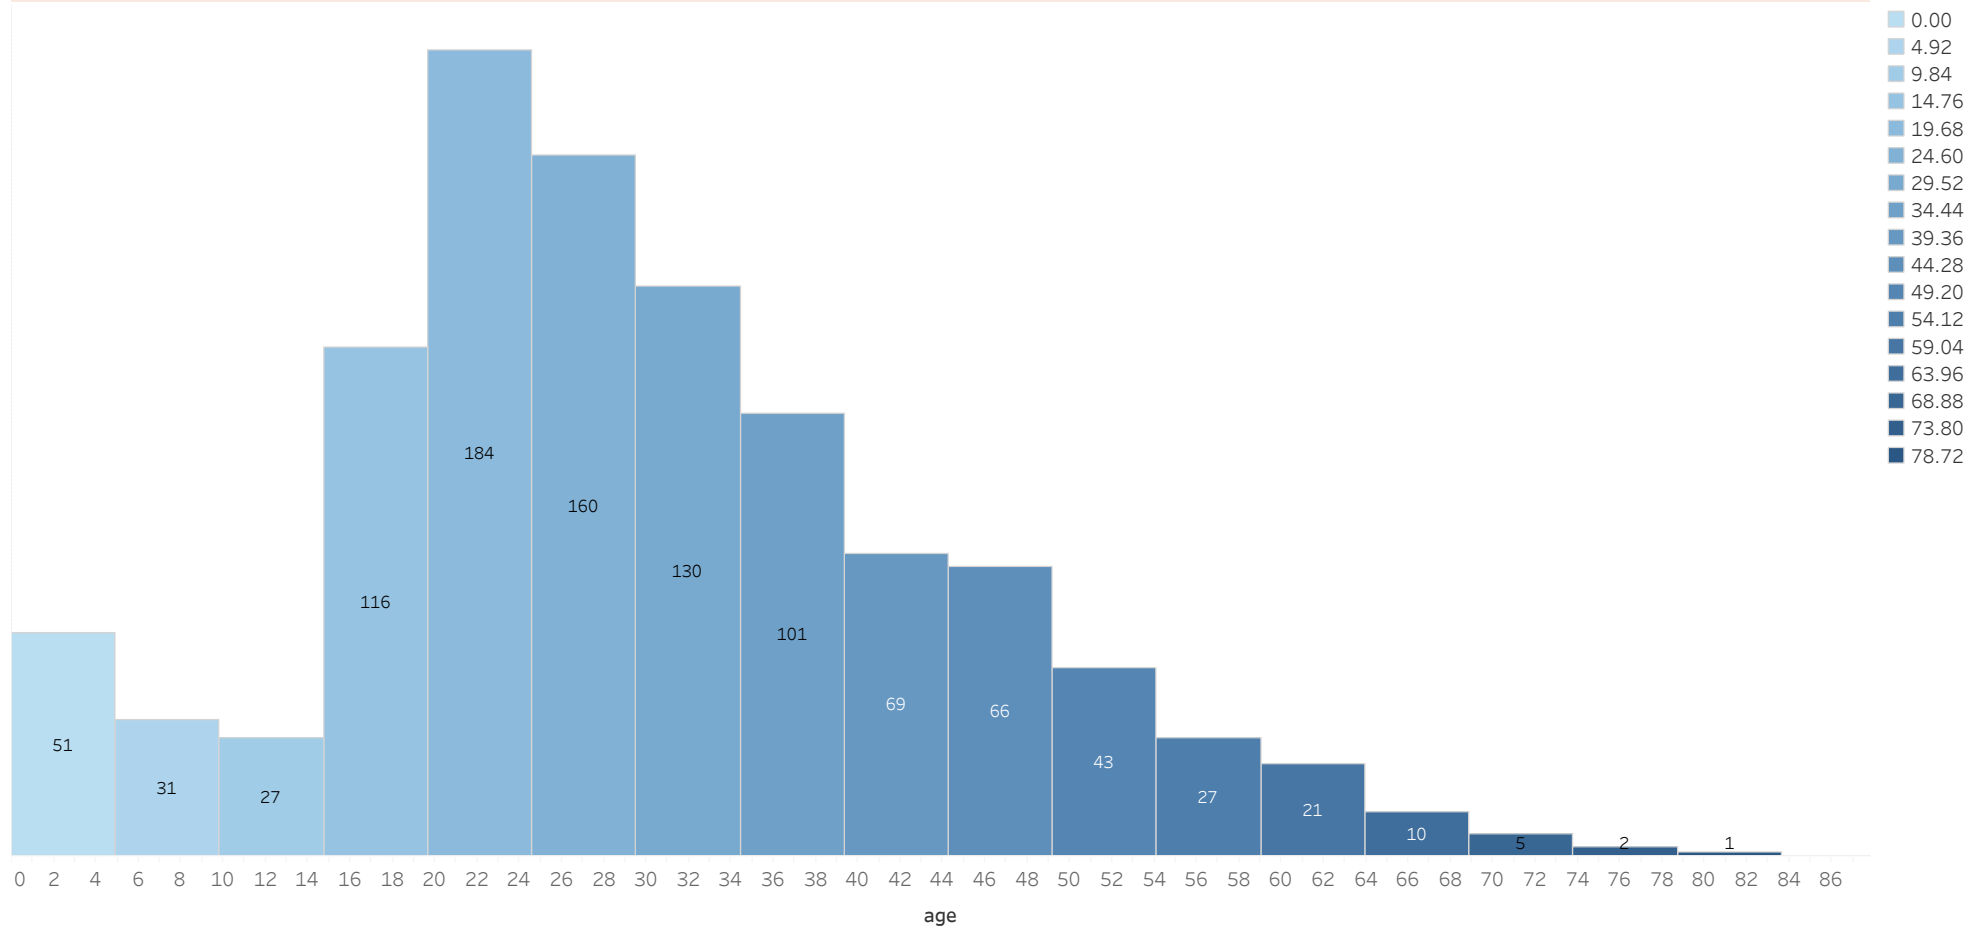

% of Total survived for each pclass broken down by sex. Color shows details about pclass. The marks are labeled by % of Total survived. The data is filtered on embarked and survived. The embarked filter excludes Null. The survived filter keeps multiple members. The view is filtered on sex and pclass. The sex filter keeps multiple members. The pclass filter keeps multiple members.

Survival rate per class

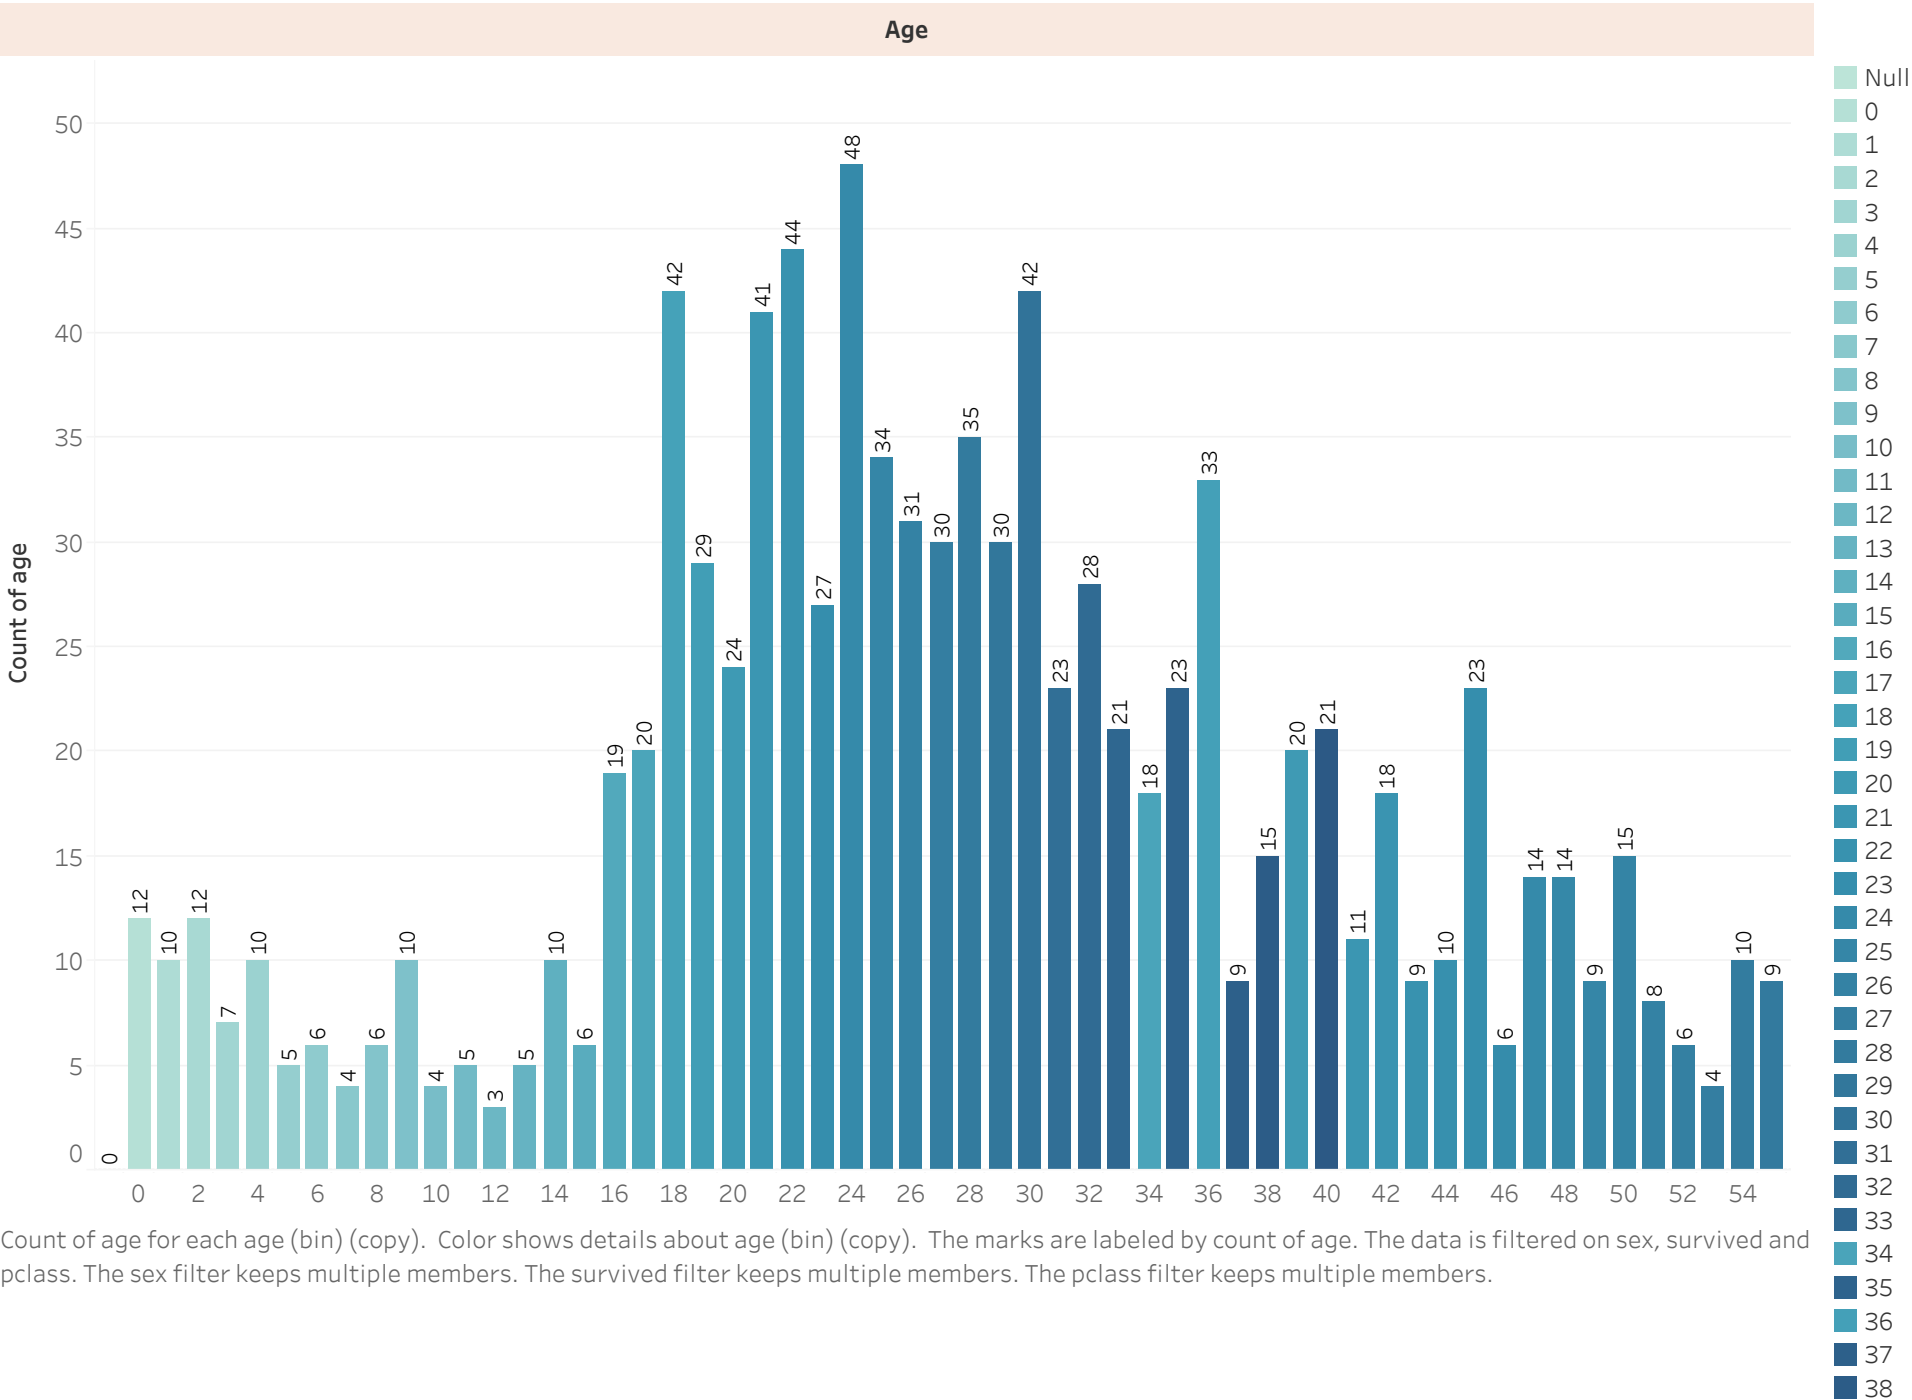

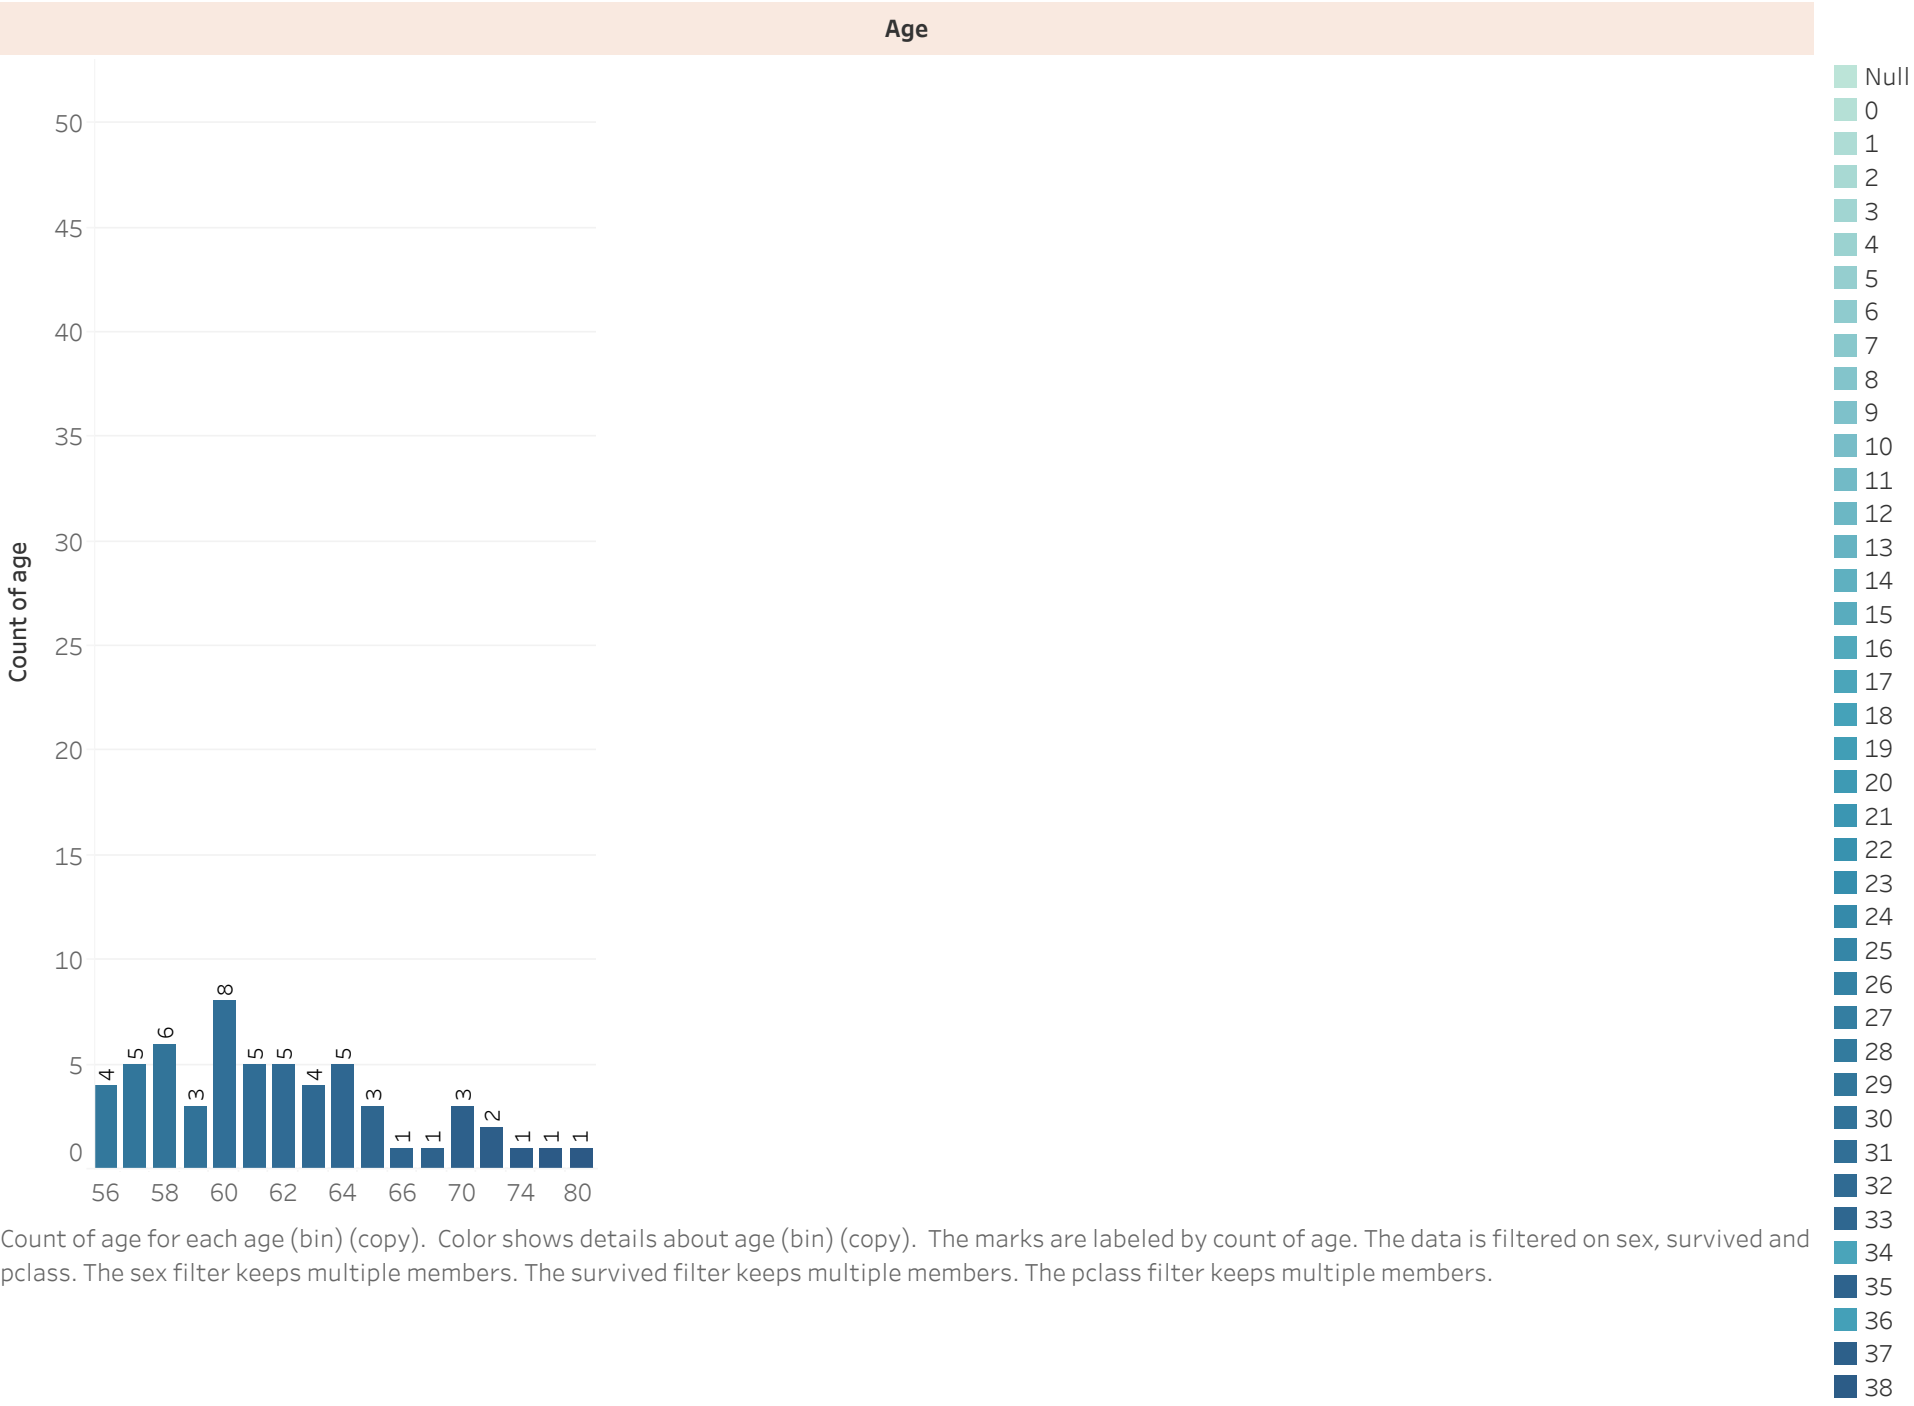

% of Total survived for each pclass broken down by sex. Color shows details about pclass. The marks are labeled by % of Total survived. The data is filtered on embarked and survived. The embarked filter excludes Null. The survived filter keeps multiple members. The view is filtered on sex and pclass. The sex filter keeps multiple members. The pclass filter keeps multiple members.

Age

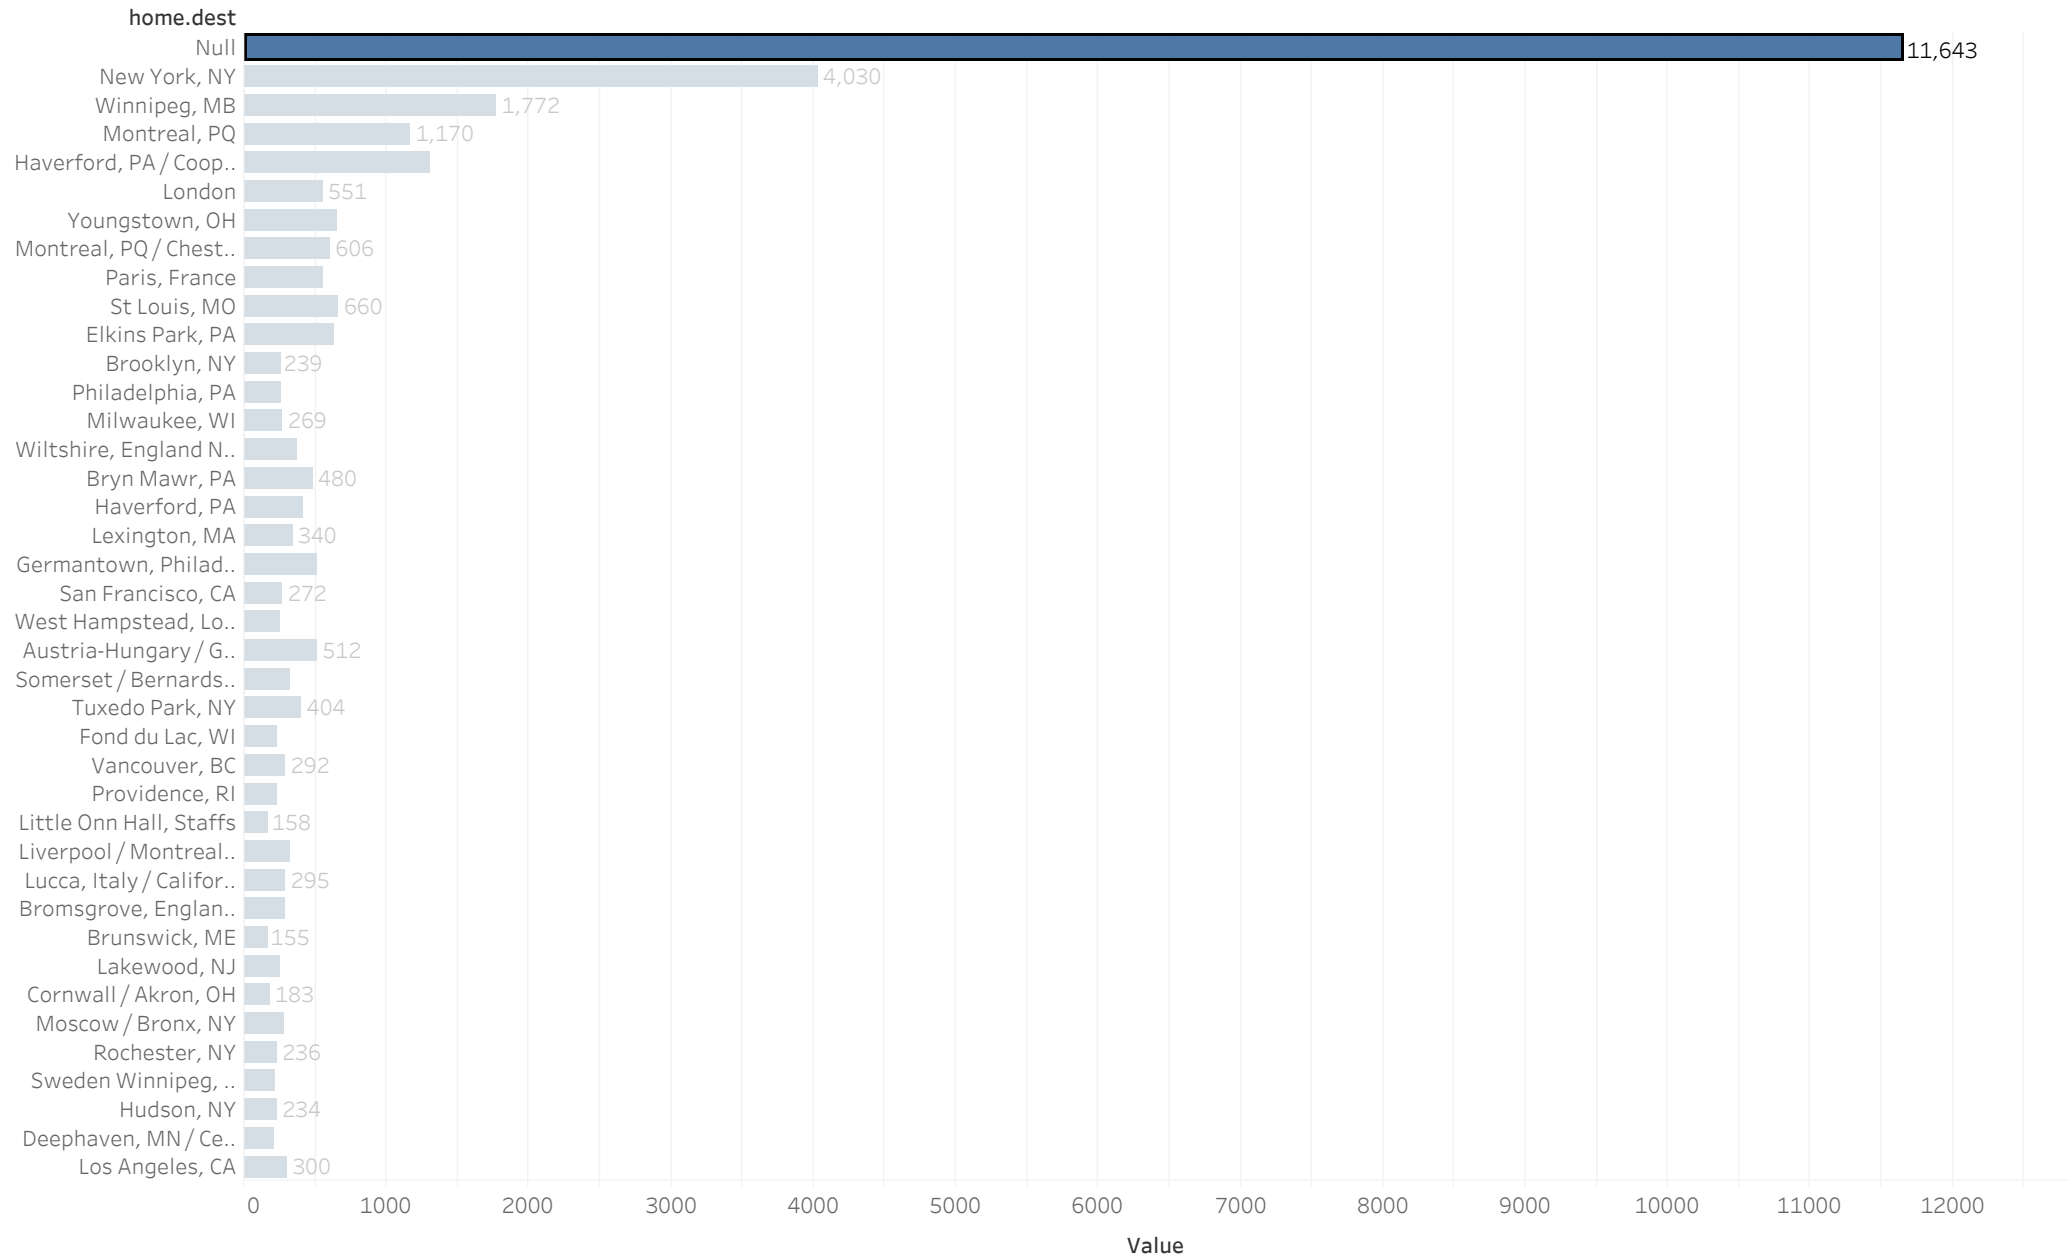

The trend of count of age for age (bin). Color shows details about age (bin). The data is filtered on sex, pclass, embarked and survived. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null. The survived filter keeps multiple members. The view is filtered on age (bin) and count of age. The age (bin) filter ranges from 0.00 to 78.72. The count of age filter keeps all values.

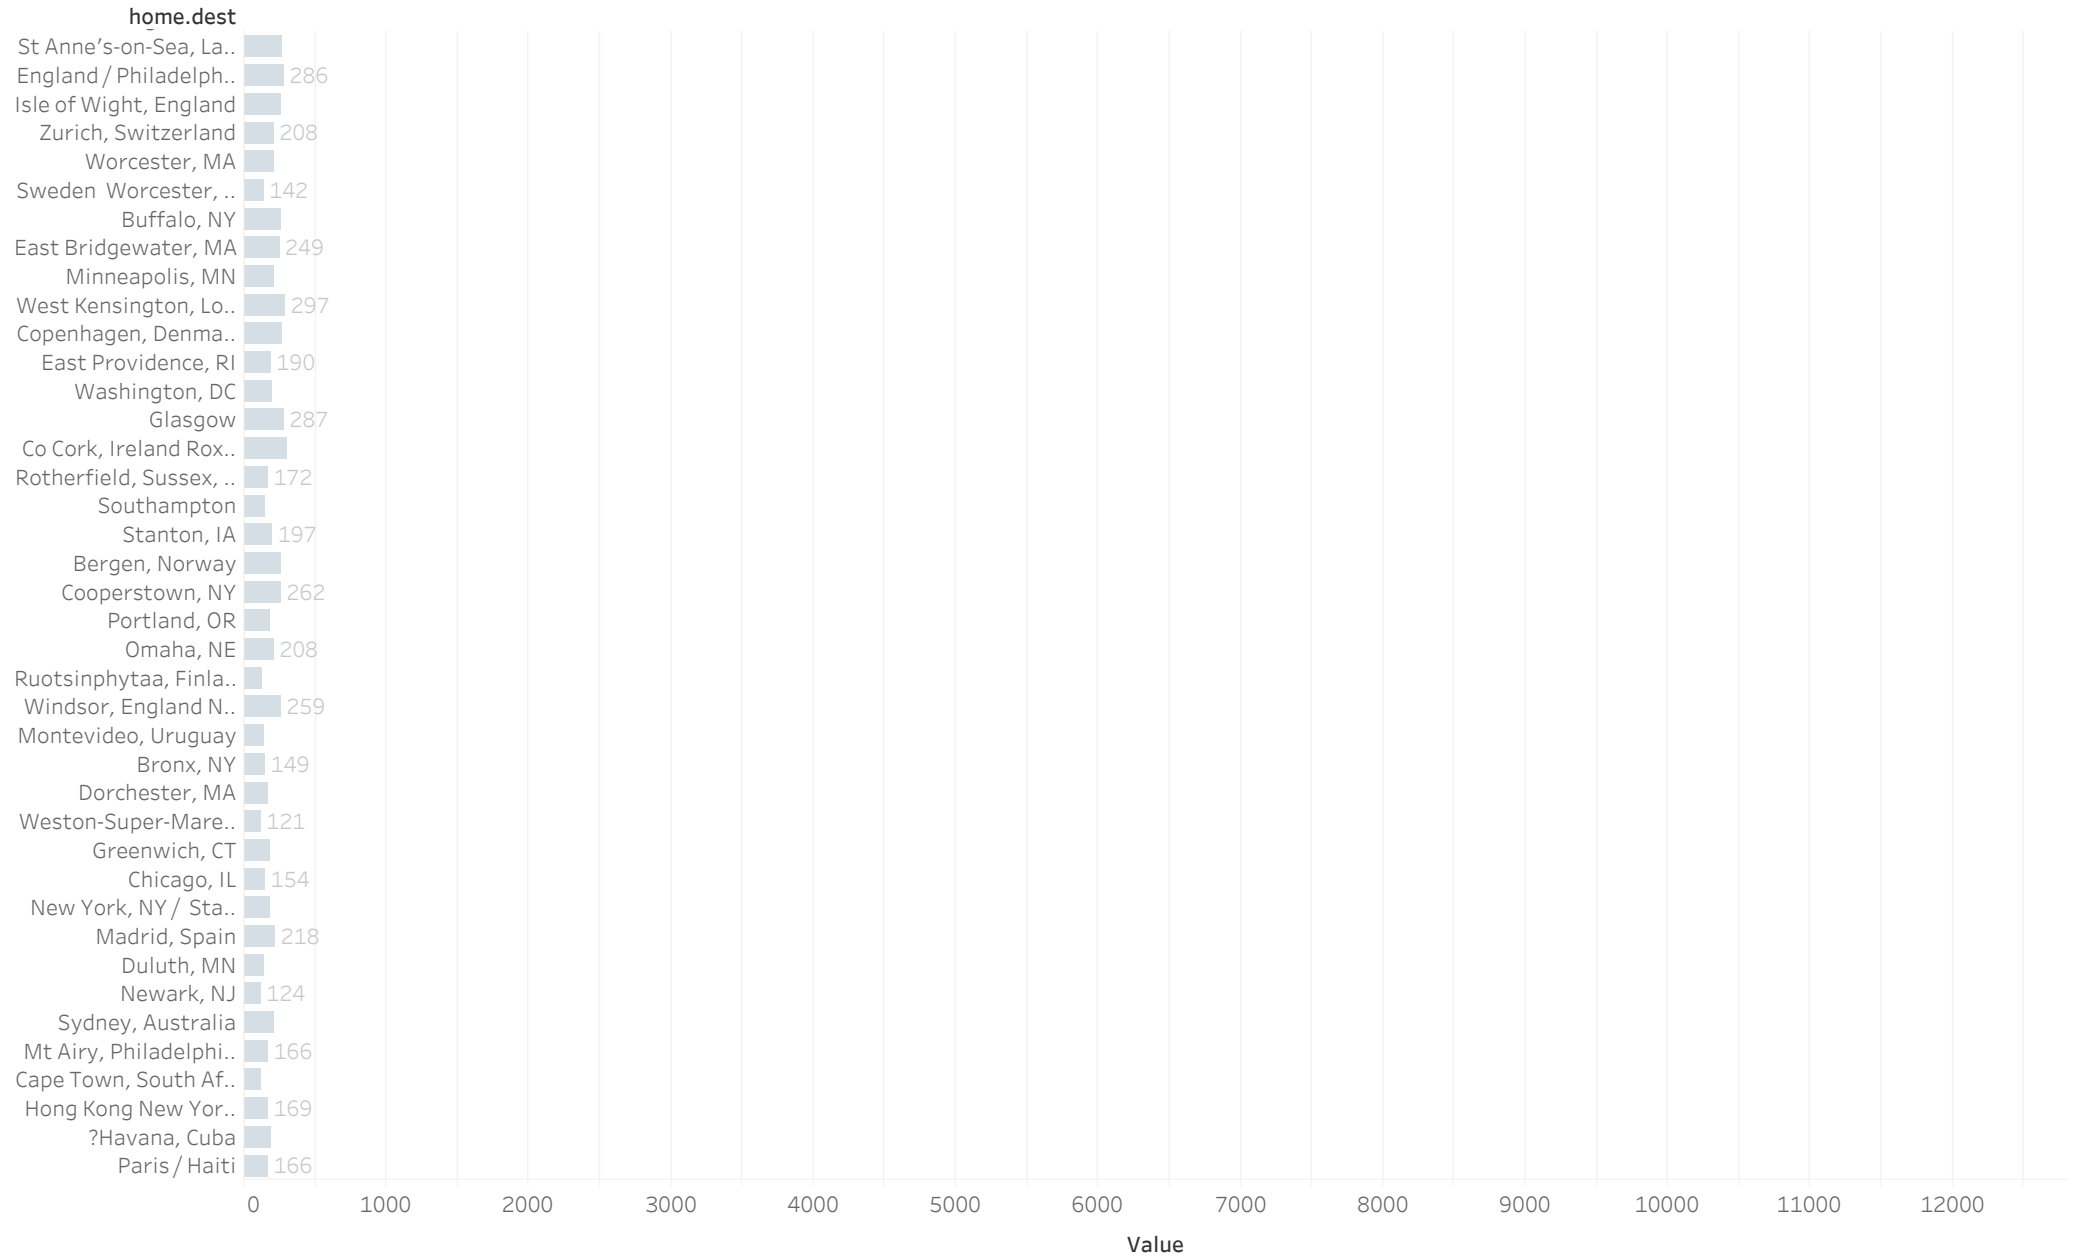

Home destination

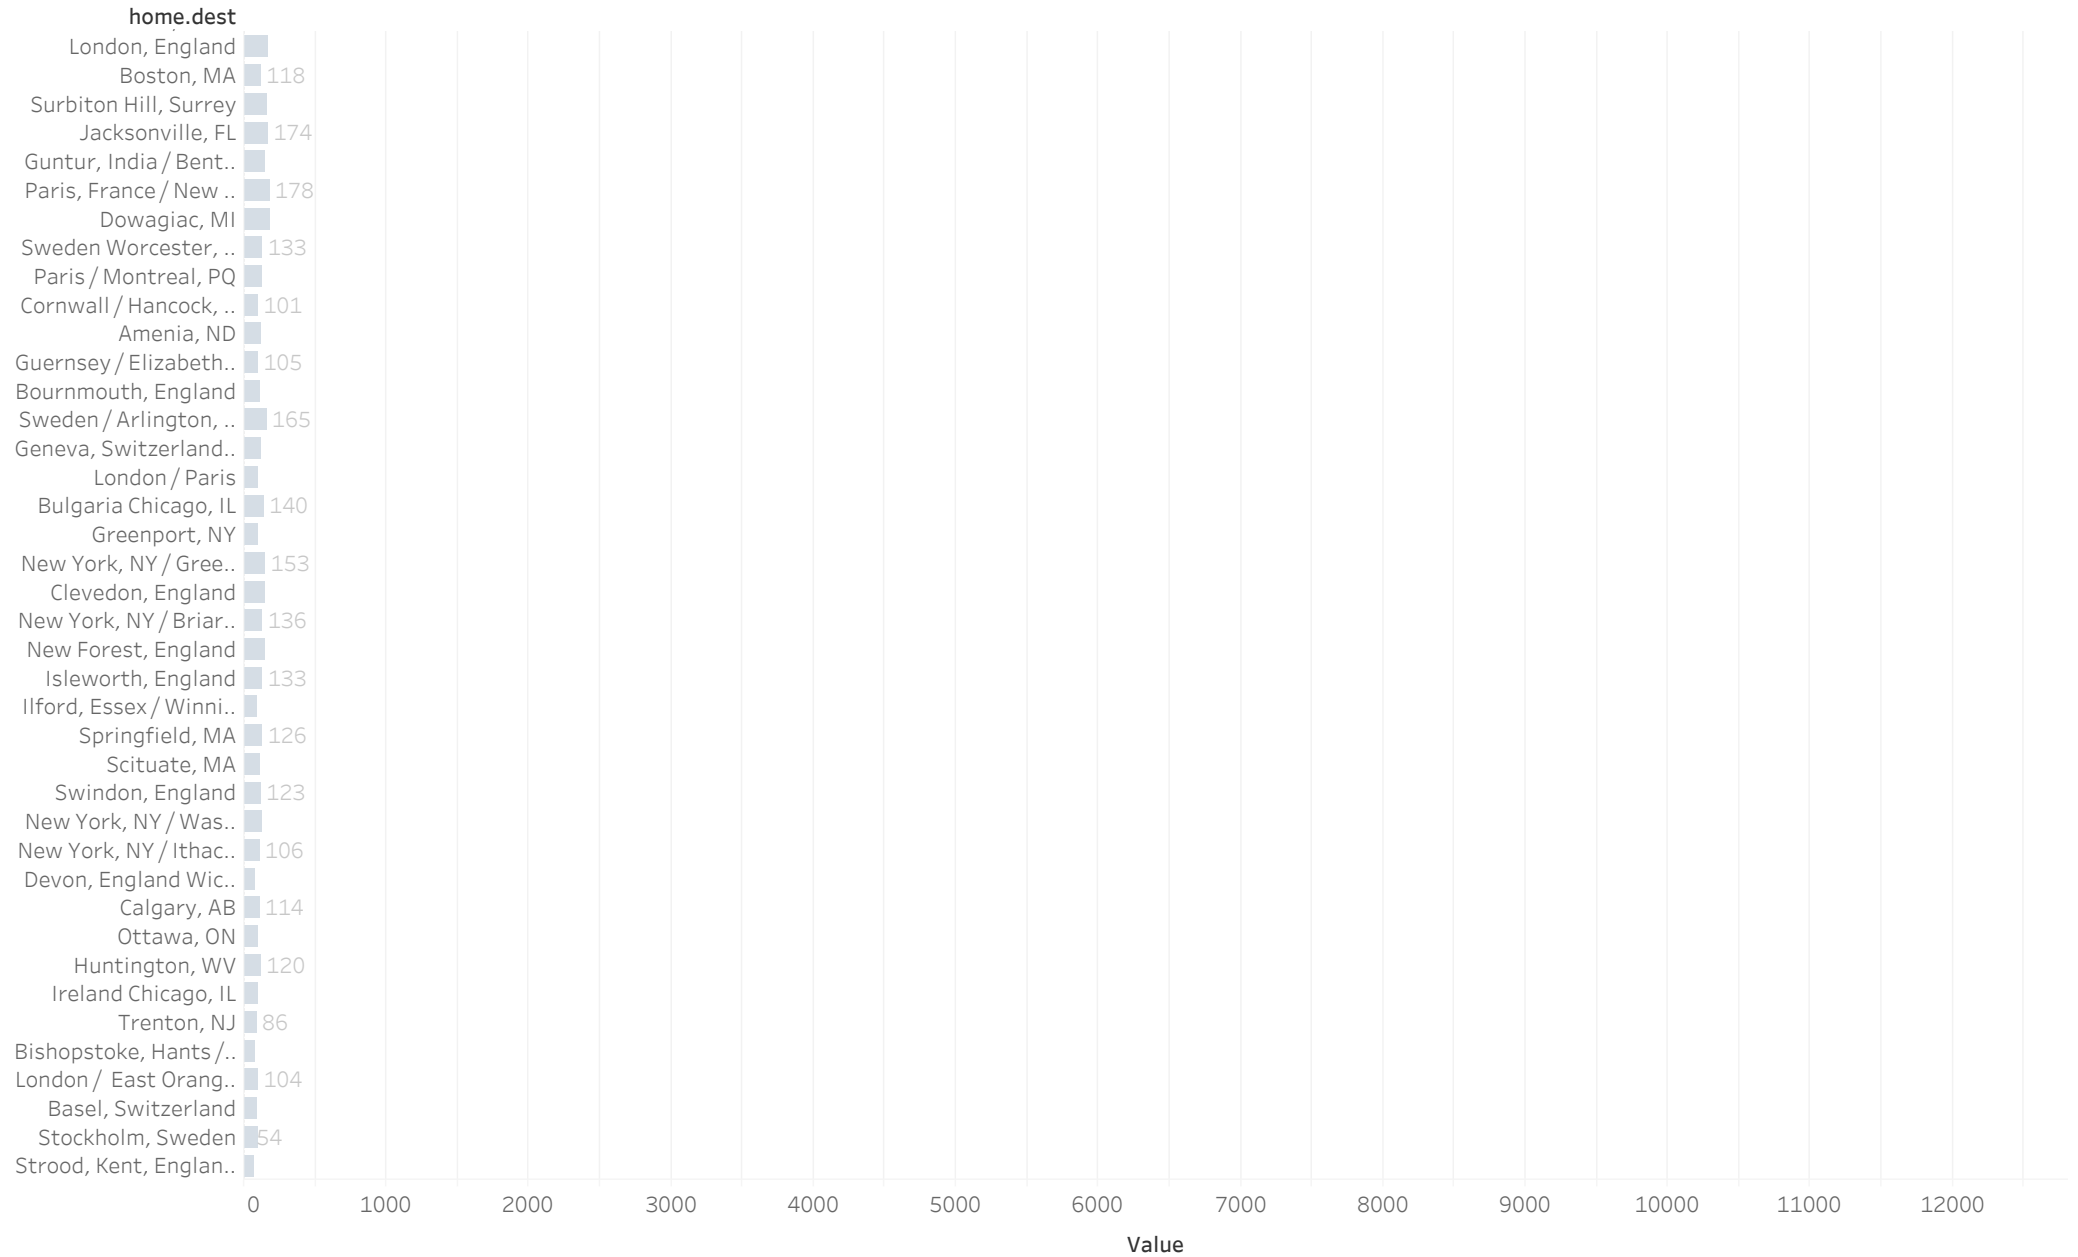

Number of Records, Total Classes Available, Total Embarked Passenger, Total Survivors ParCh, Total passenger, Zero donut, age, body, fare, parch, pclass, sibsp and survived for each home.dest. The data is filtered on sex, pclass and embarked. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null.

Home destination

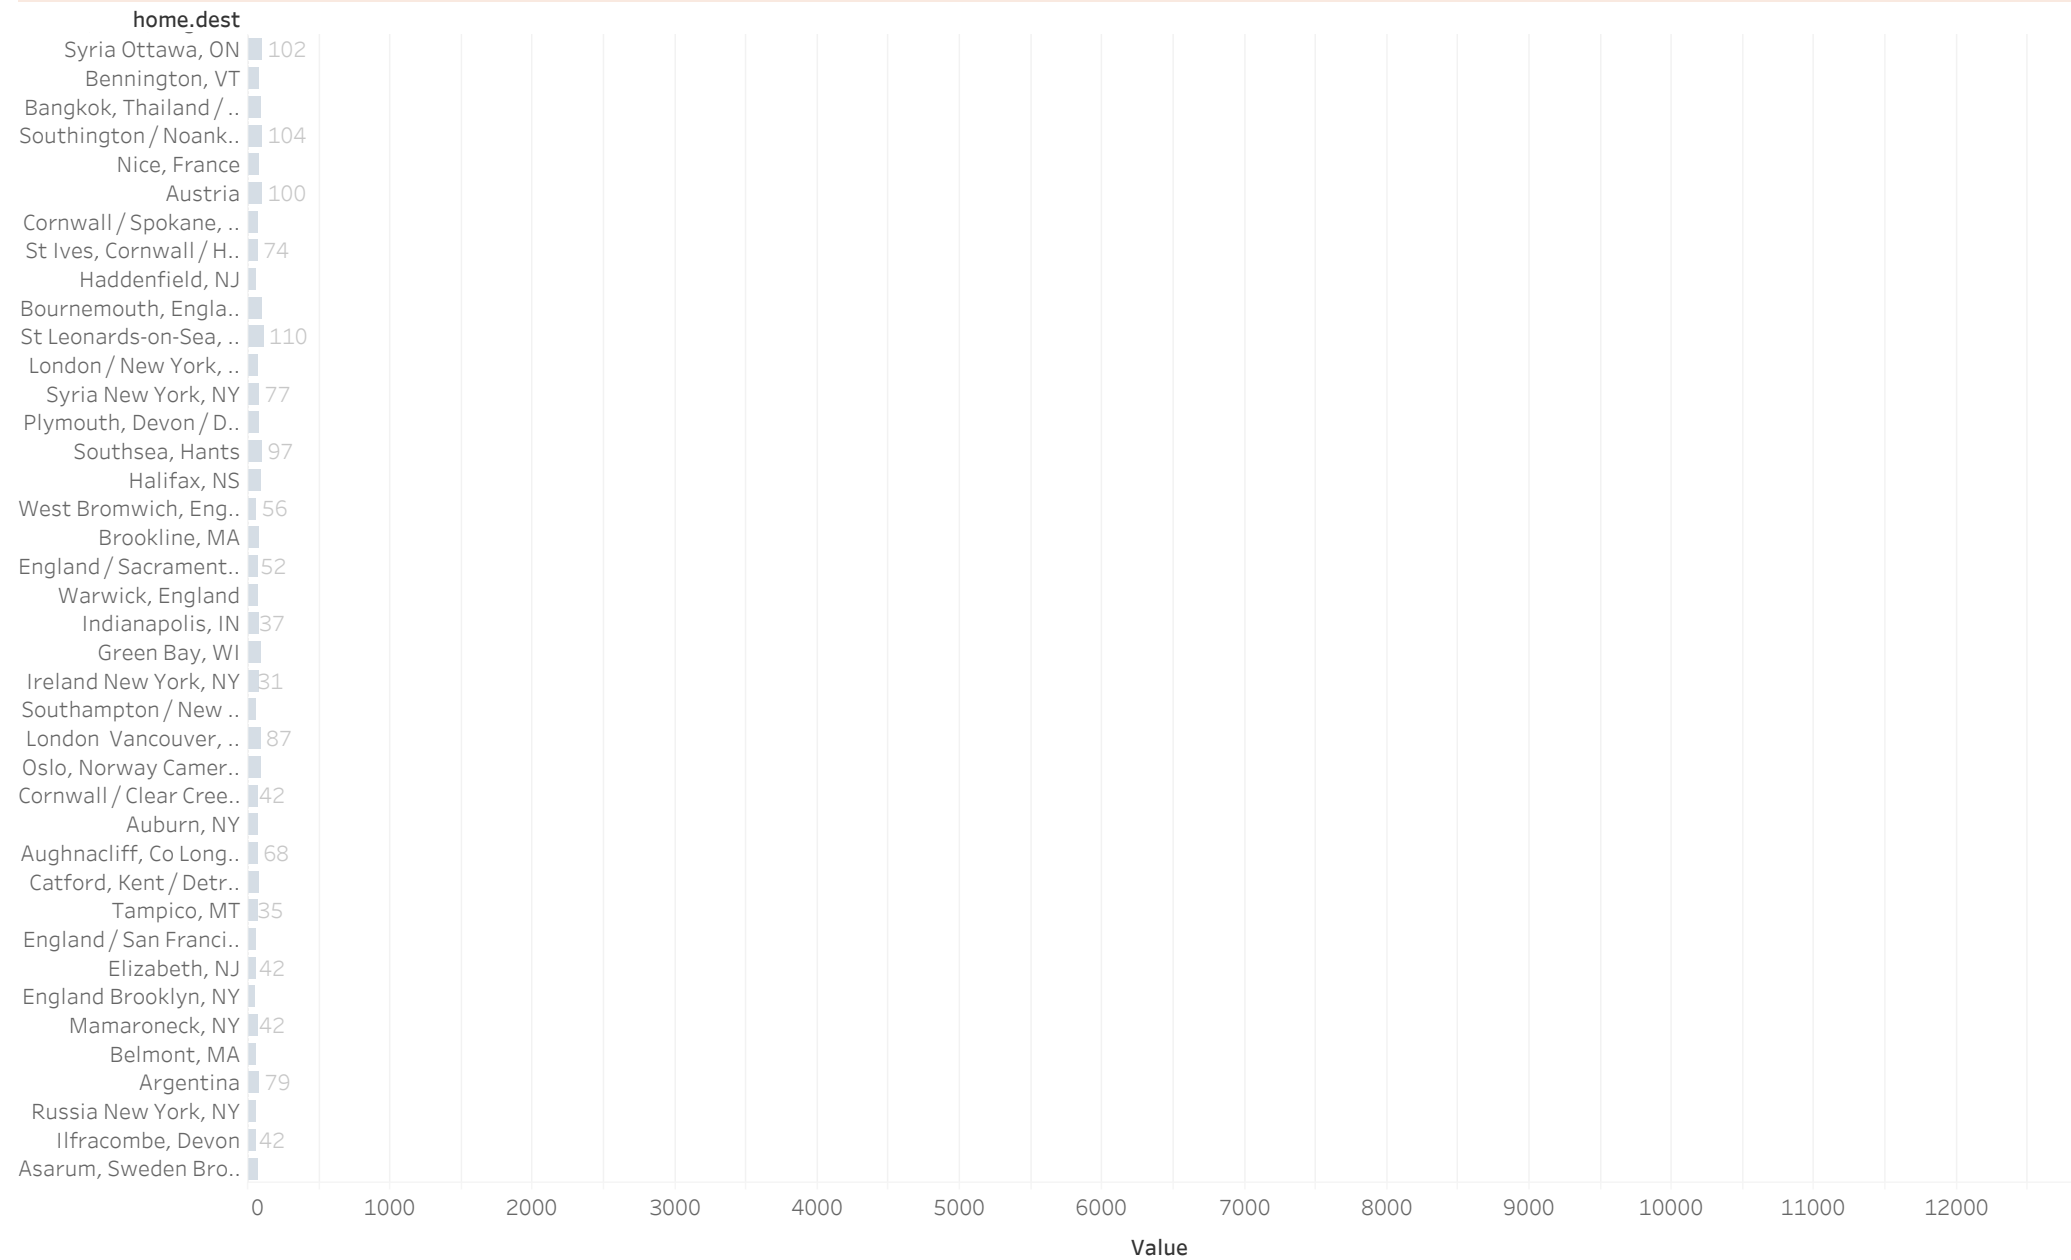

Number of Records, Total Classes Available, Total Embarked Passenger, Total Survivors ParCh, Total passenger, Zero donut, age, body, fare, parch, pclass, sibsp and survived for each home.dest. The data is filtered on sex, pclass and embarked. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null.

The data is filtered on sex, pclass and embarked. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null.

Home destination

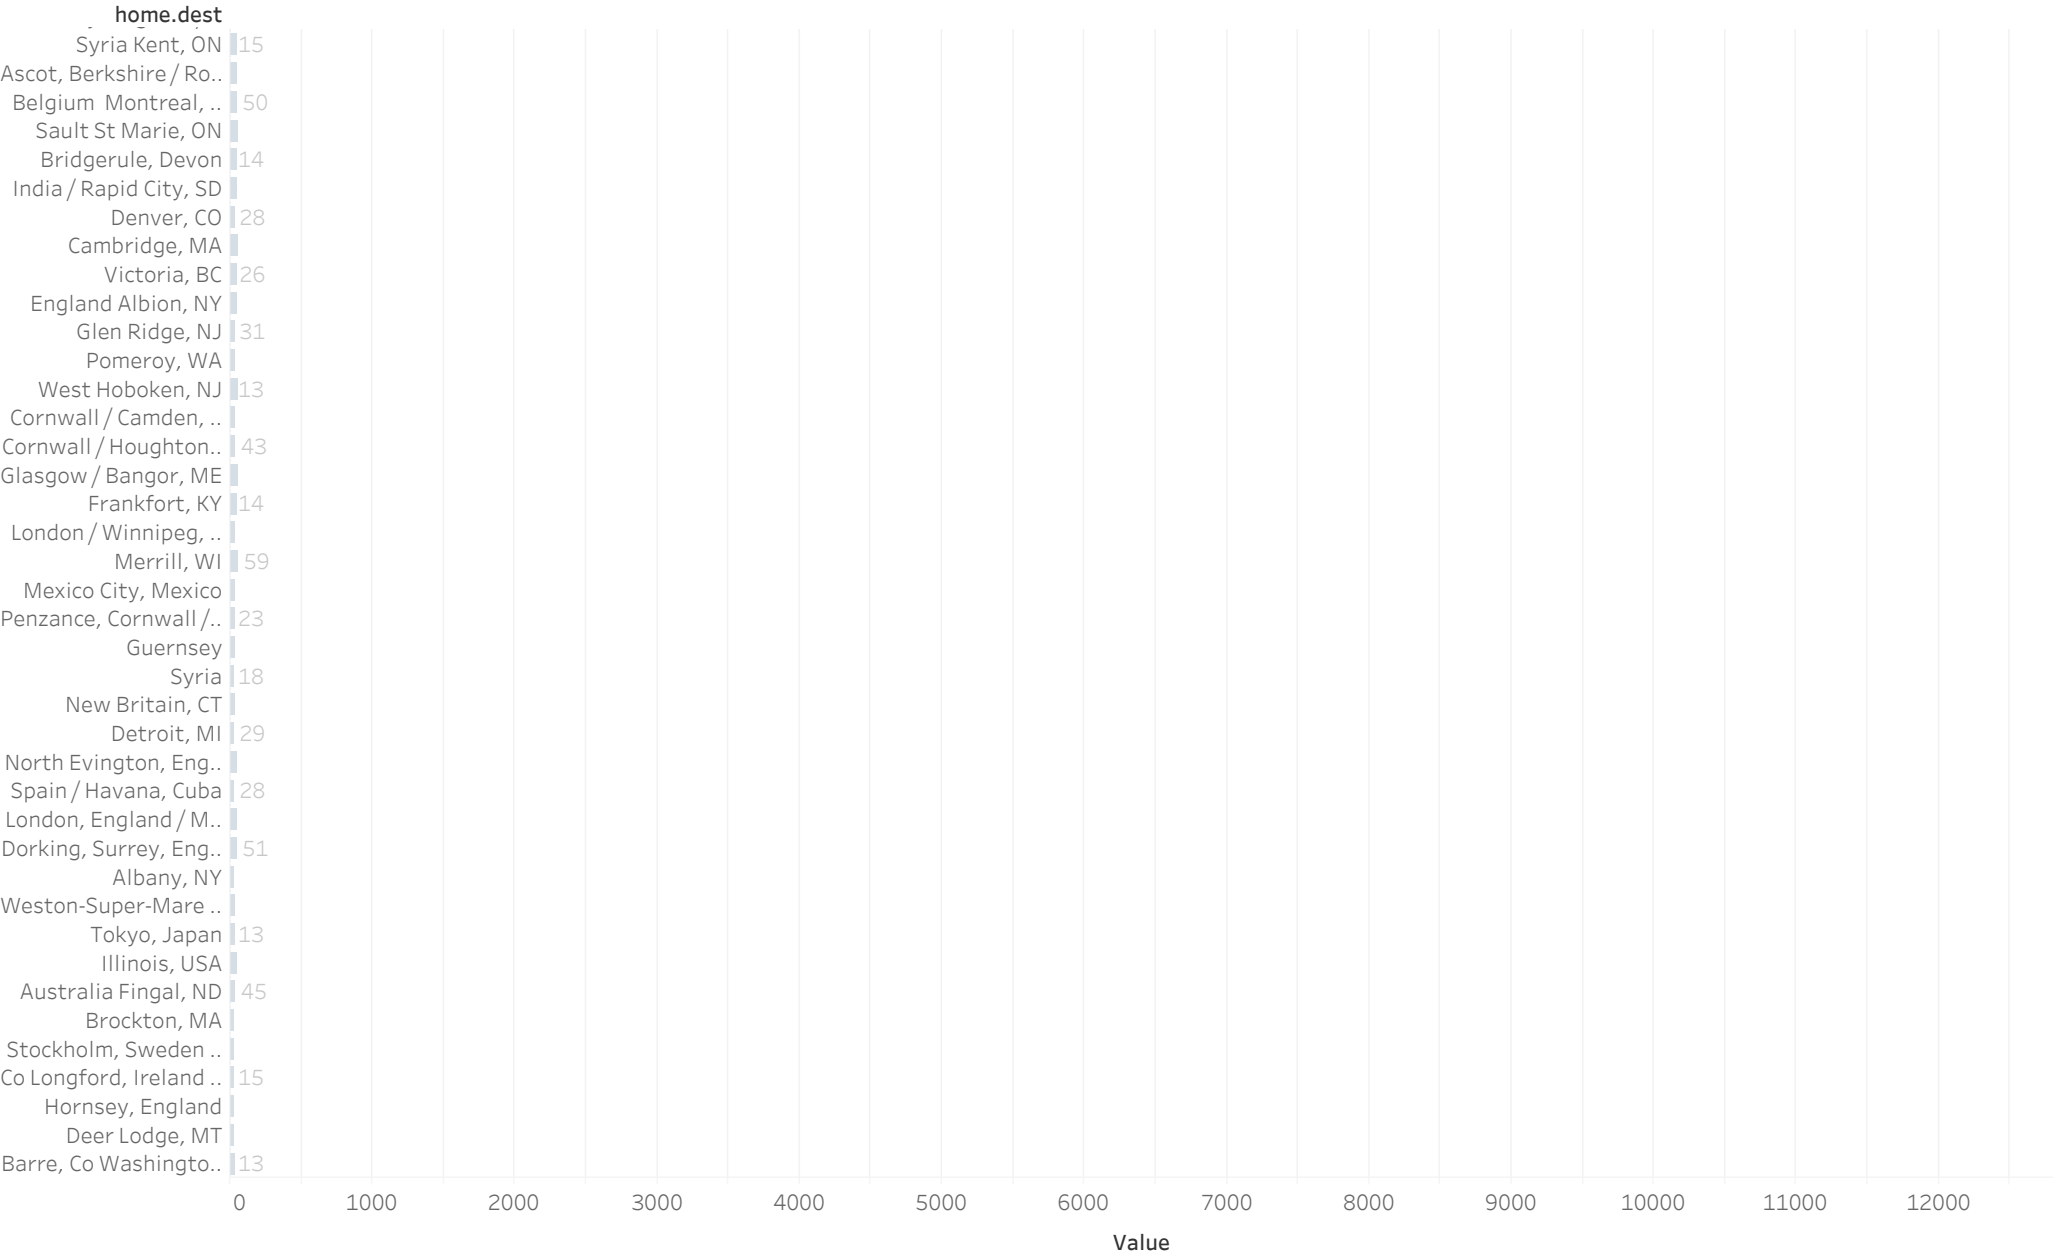

Number of Records, Total Classes Available, Total Embarked Passenger, Total Survivors ParCh, Total passenger, Zero donut, age, body, fare, parch, pclass, sibsp and survived for each home.dest. The data is filtered on sex, pclass and embarked. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null.

Home destination

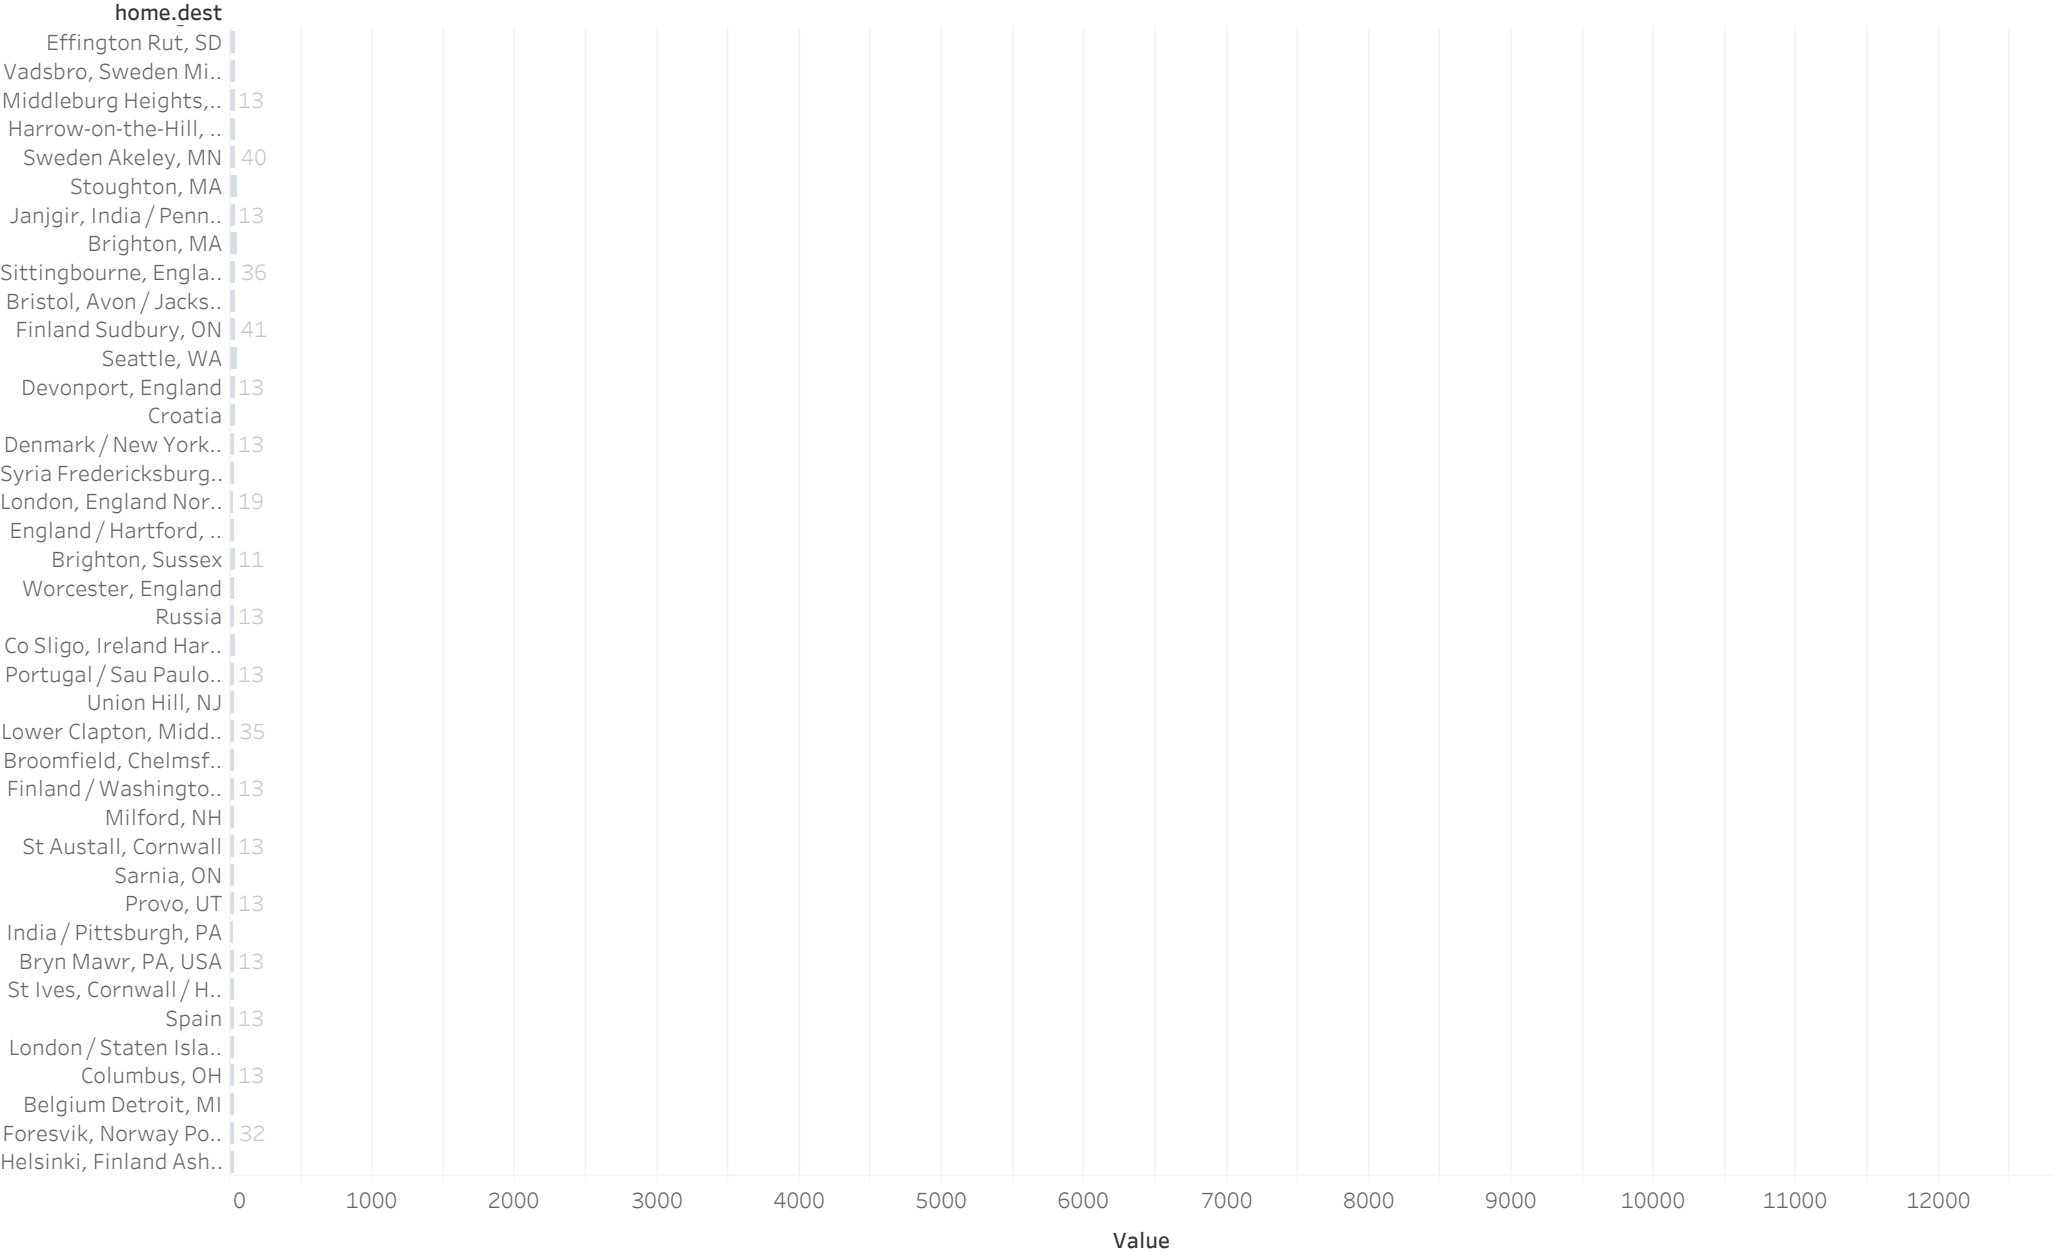

Number of Records, Total Classes Available, Total Embarked Passenger, Total Survivors ParCh, Total passenger, Zero donut, age, body, fare, parch, pclass, sibsp and survived for each home.dest. The data is filtered on sex, pclass and embarked. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null.

Number of Records, Total Classes Available, Total Embarked Passenger, Total Survivors ParCh, Total passenger, Zero donut, age, body, fare, parch, pclass, sibsp and survived for each home.dest. The data is filtered on sex, pclass and embarked. The sex filter keeps multiple members. The pclass filter keeps multiple members. The embarked filter excludes Null.

Fare for each survived
broken down by pclass.
The data is filtered on sex
and embarked. The sex
filter keeps multiple
members. The embarked
filter excludes Null. The
view is filtered on fare and
pclass. The fare filter
ranges from 0.0 to 512.3.
The pclass filter keeps
multiple members.

Fare per passenger

Count of fare for each fare (bin) 2. Color shows details about pclass. The data is filtered on fare (bin), sex and embarked. The fare (bin) filter includes values less than or equal to 490.6. The sex filter keeps multiple members. The embarked filter excludes Null. The view is filtered on pclass, which keeps multiple members.

Fare per passenger

Count of fare for each fare (bin) 2. Color shows details about pclass. The data is filtered on fare (bin), sex and embarked. The fare (bin) filter includes values less than or equal to 490.6. The sex filter keeps multiple members. The embarked filter excludes Null. The view is filtered on pclass, which keeps multiple members.
